Education

Western University

BSc. Major in Computer Science, Minor in Biology

London ON Oct 2021

Skills

| Languages | Java, JavaScript, C++, SQL, HTML, CSS |
|----------------------|--|
| Frameworks/Libraries | React.js, Redux, Node.js, Express.js, Bootstrap, Material UI, Jest |
| Tools | PostgreSQL, MongoDB, Linux, Git, Apache Maven |

Projects_

Full Stack Review Site - Hopsy

JAVASCRIPT, NODE.JS, EXPRESS.JS, MONGODB, BOOTSTRAP, EJS, AWS

- Developed a RESTful API backend using Express.js and integrated Passport middleware for user authentication
- Built a fully responsive frontend using Bootstrap, CSS and EJS to ensure optimal viewing experience across devices
- Integrated MongoDB using Mongoose with custom hooks to enforce data relations and security
- Implemented cloud file storage through Cloudinary integration, allowing users to upload images of breweries
- Deployed to remote AWS EC2 instance linked to a remote MongoDB Atlas using Nginx server as a reverse proxy

Contribution - Real-Time Chat Application

React, Redux, Node.js, Express.js, PostgreSQL, Socket.io

- · Implemented tickets and submitted pull requests based on requirements using test driven development
- Redesigned database models, REST api routes on backend to facilitate new features
- Added new functionality on front end using Redux, and React with MaterialUI to requirement spec
- Tested new features using Jest for unit testing and Selenium for E2E testing

Financial Services Dashboard App

JAVA, APACHE MAVEN, AWS

- Designed and developed Java desktop application implementing Service-Oriented-Architecture using Model-View-Controller and Publish-Subscribe patterns to ensure system was highly modifiable
- · Implemented multi-threaded services deployed independently on Linux AWS EC2 Instances to allow concurrent users
- Developed as part of a team of five within Software Architecture course using Agile methodologies

Mock Store Application

C++

- Constructed a mock store system with user authentication, inventory management, shopping cart, text-interfaces and file encryption for use in a Linux environment
- Implemented parsing functions to read/save from local storage to allow data persistence across sessions
- Designed and developed as part of team of four for Object Oriented Design and Analysis Course using Agile development practices facilitated through
 Jira

Experience_____

Kingston Pro Painters

PAINTER - SITE MANAGER

- Managed crews of 4 painters on projects between \$1000 and \$10000, ensuring high levels of quality and efficiency
- · Increased customer satisfaction by meeting directly with client to set project expectations and quality standards

Extracurriculars

Head Tournament Organizer

WESTERN ELECTRONIC GAMING ASSOCIATION

- Organized and operated 50+ local and regional tournaments with 30-80 entrants
- Delegated tasks to group of 10 volunteers, ensuring tournament logistics run smoothly
- Ran charity events in support of The Centre for Addiction and Mental Health (CAMH) generating over \$2000 in charitable donations

London, ON Sept 2017 - Aug 2019

Kingston, ON May 2017 - Aug 2019
